## SUMMARY

Aspiring Fullstack Developer with a broad range of skills. Demonstrated a history in marketing and sales, through generation of leads for different companies.

## PROJECTS

### Side Scroller/Jumping Game – NJIT

Developed a simple side scroller game for the browser

- Utilized HTML/CSS and Javascript to create a fun and simple sidescroller/jumping game that keeps your high score

### Travelr/MERN Project – NJIT

Developed a picture sharing application using MERN technologies

- Using MongoDB, Express, React, and Node, me and 3 of my peers created a functional app
- The purpose of the app is to allow users to upload, edit, or delete posts about places they have traveled

## PROFESSIONAL EXPERIENCE

### Danny's Pizza | March 2022–Present

#### Pizza Delivery

- In a timely manner took and delivered customers' food orders
- Acquire ingredients and other restaurant necessities from local food markets

### Creative Acquisitions(Quill and Wynnbet) | January 2022–March 2022

#### Sales Consultant

- Creative Acquisitions is a company that other bigger companies outsource their marketing to
- Look into small businesses in nearby NJ towns that were not yet apart of our gold program and would benefit from being apart of it
- Contacted businesses in person and took note of what kind of business they ran and what products we could help save them money on
- To help with this process a company app was utilized that to see which businesses belonged to our gold program, needed a renewal on their account, or did not belong to the program at all

### Venture Solar | July 2021–September 2021

#### Solar Sales Representative

- Being that solar panels are subsidized in the state of New Jersey it is an affordable way for most families to save money on electricity, so the work mainly consisted of finding families who qualified for solar that would benefit from going solar
- Contacted local municipalities and acquired proper paperwork to be allowed to conduct our business
- The app Spotio was used to locate homes that would qualify for solar. Spotio is similar to google maps, but allows you to mark homes you've been to and make notes of if their homes' qualified as well as if they were interested or uninterested in solar
